2025-26

Eco Committee

Our Aims

- To reduce the amount of litter in and around our school.
- To develop our garden for classes to grow plants.
- To reduce the amount of electricity we use by turning off lights when not being used.
- Minimise waste by recycling materials in school, reducing paper waste and using reusable items like water bottles.

How will we know?

- Less visual litter in school and local community, collecting less waste each time we litter pick.
- Classes can safely use the garden to grow plants.
- Electricity consumption reduces and energy monitors record few incidents of electrical items being left on when not in use.
- Nearly all pupils using reusable drinks bottles. Scrap paper trays in every class and by the photo copier. Class recycle bins being used correctly and monitors record less incorrect waste in the wrong bins.

Actions for 2025-26

- Litter
- Outside Garden
- Energy
- Reduce, Reuse and Recycle
